## Mathematics of Computation

This journal publishes research articles in computational mathematics. Areas covered include numerical analysis, with emphasis on the mathematical analysis and development of methods, computational number theory and algebra, and related fields. Table errata and reviews of books in areas related to computational mathematics are also included.

**Submission information.** See *Information for Authors* at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Postings to the AMS website.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

**Subscription information.** *Mathematics of Computation* is published quarterly. Beginning in January 1996 *Mathematics of Computation* is accessible from [www.ams.org/publications/](http://www.ams.org/publications/). Subscription prices for Volume 70 (2001) are as follows: for paper delivery, \$366 list, \$293 institutional member, \$329 corporate member, \$238 member of CBMS organizations; \$220 individual member; for electronic delivery, \$329 list, \$263 institutional member, \$296 corporate member, \$214 member of CBMS organizations, \$197 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add \$12 for surface delivery outside the United States and India; \$18 to India. Expedited delivery to destinations in North America is \$17; elsewhere \$56.

**Back number information.** For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

**Copying and reprinting.** Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to [reprint-permission@ams.org](mailto:reprint-permission@ams.org).

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

---

*Mathematics of Computation* is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

© 2001 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*®, *Science Citation Index*™-Expanded, *ISI Alerting Services*™, *CompuMath Citation Index*®, and *Current Contents*®/*Physical, Chemical & Earth Sciences*.

⊗ The paper used in this book is acid-free and falls within the guidelines established to ensure permanence and durability.

**MATHEMATICS OF COMPUTATION**  
**CONTENTS**

Vol. 70, No. 233

January 2001

<p><b>T. Tiihonen</b>, Shape calculus and finite element method in smooth domains .....</p> <p><b>Jinchao Xu and Aihui Zhou</b>, A two-grid discretization scheme for eigenvalue problems .....</p> <p><b>Albert Cohen, Wolfgang Dahmen, and Ronald DeVore</b>, Adaptive wavelet methods for elliptic operator equations: Convergence rates .....</p> <p><b>Paul Houston and Endre Süli</b>, Adaptive Lagrange-Galerkin methods for unsteady convection-diffusion problems .....</p> <p><b>Sergey Korotov, Michal Krížek, and Pekka Neittaanmäki</b>, Weakened acute type condition for tetrahedral triangulations and the discrete maximum principle .....</p> <p><b>A. M. Davie and J. G. Gaines</b>, Convergence of numerical schemes for the solution of parabolic stochastic partial differential equations .....</p> <p><b>Arturo Kohatsu-Higa</b>, Weak approximations. A Malliavin calculus approach .....</p> <p><b>A. L. Dontchev and William W. Hager</b>, The Euler approximation in state constrained optimal control .....</p> <p><b>Aeyoung Park Jang and Seymour Haber</b>, Numerical indefinite integration of functions with singularities .....</p> <p><b>S. A. Sauter and C. Lage</b>, Transformation of hypersingular integrals and black-box cubature .....</p> <p><b>G. Mastroianni and G. Monegato</b>, Error estimates in the numerical evaluation of some BEM singular integrals .....</p> <p><b>Sangwoo Heo and Yuan Xu</b>, Constructing fully symmetric cubature formulae for the sphere .....</p> <p><b>J. C. Santos-León</b>, Error bounds for interpolatory quadrature rules on the unit circle .....</p> <p><b>A. Papageorgiou</b>, Fast convergence of quasi-Monte Carlo for a class of isotropic integrals .....</p> <p><b>M. D. Buhmann</b>, A new class of radial basis functions with compact support .....</p> <p><b>Jean-Pierre Dedieu and Mike Shub</b>, On simple double zeros and badly conditioned zeros of analytic functions of <math>n</math> variables .....</p> <p><b>Jérôme Dégot</b>, A condition number theorem for underdetermined polynomial systems .....</p> <p><b>Jia-Juan Liang, Kai-Tai Fang, Fred J. Hickernell, and Runze Li</b>, Testing multivariate uniformity and its applications .....</p> <p><b>Peter Gaal and Solomon W. Golomb</b>, Exhaustive determination of (1023, 511, 255)-cyclic difference sets .....</p> <p><b>Emmanuel Peyre and Yuri Tschinkel</b>, Tamagawa numbers of diagonal cubic surfaces, numerical evidence .....</p> <p><b>Daniel J. Bernstein</b>, Enumerating solutions to <math>p(a) + q(b) = r(c) + s(d)</math> .....</p> <p><b>Christian Batut</b>, Classification of quintic eutactic forms .....</p>	<p>1</p> <p>17</p> <p>27</p> <p>77</p> <p>107</p> <p>121</p> <p>135</p> <p>173</p> <p>205</p> <p>223</p> <p>251</p> <p>269</p> <p>281</p> <p>297</p> <p>307</p> <p>319</p> <p>329</p> <p>337</p> <p>357</p> <p>367</p> <p>389</p> <p>395</p>
